History: This message has been replied to and forwarded.

Stephanie,

On August 25, Frontier received the new WYPDES permit that requires DMR reporting to EPA. WDEQ requires reporting using the eDMR system that they have designed. The modifications to the permit required eDMR modifications as well. The current state of the eDMR needs some revision so that paper copies are accurate for submission to EPA. As such, Frontier is not in a position to certify the eDMR. All the data has been input and validated. Once this is resolved, the eDMR will be certified and the copies supplied to EPA.

If you have any questions or concern, please contact me.

Regards,

Scott M. Denton
Environmental Engineer
